STRUCTURES LIKE RIPPLES IN THE SAND

RAUVISIO wave

The structured laminate RAUVISIO wave features an impressive, unique wave-like surface. Material attributes can affect the way in which the light interacts with the surface, creating fascinating patterns, bringing the surface to life.

3D surface structure

The wave-like pattern of the surface is reminiscent of a deep-milled and lacquered MDF board. However, because the surface no longer needs to be processed manually, RAUVISIO wave saves considerable amounts of time and cost during production.
